Erin Parks

Erin Parks is Sierra Sage Treatment Center's Registered Nurse. She is a hero because her main focus is, and always has been, our students' health and well-being. She is a dedicated employee who has ensured that our mission is constantly maintained. Nurse Parks has done an amazing job keeping our students healthy during this pandemic: she continues to go above and beyond by helping in many capacities, including staying on call, confirming everyone has what they need to maintain forward momentum, and by being a key point of contact for those youth and staff who have questions. She even gave our students a spa day and wrapped their Christmas presents, after assisting them with their own community projects by assembling first aid kits. We are truly grateful for our own incredible local hero.
