Mary McCullough

Mary McCullough, RN may be new to the Harrisburg Juvenile Treatment Center-but she has already jumped in with both feet, actively leading the charge in our battle against COVID. In addition to PCR testing, compassionate care, and serving as a liaison with DYS and the local health department, Nurse McCullough sometimes works multiple shifts on weekends, nights, and even holidays (including Christmas) to care for students and calm their anxieties. She has volunteered to relieve staff for breaks, assisted HR in supporting us by providing sandwiches and snacks, and provided invaluable guidance and direction whenever 'teachable moments' present themselves. She has even helped our sister programs at Dermott and Mansfield. Truly, Nurse McCullough has proven that the greater the obstacle, the greater her energy in conquering it!
