## WAGC Nurses

During the pandemic, the Nursing Department at Walton Academy for Growth and Change has worked diligently to ensure the safety of all student athletes and staff. When COVID-positive individuals were identified during routine testing, these dedicated nurses stepped in to isolate, re-test, and educate their patients regarding next steps and essential care procedures. The combined rapid response of Health Services Administrator Patricia Durkin, RN; Florida Regional Medical Director Mary Tracy, RN; and Nurse McKenzie Shell, RN successfully curtailed the spread of the virus within our facility. On behalf of all of us at Walton Academy for Growth and Change, we would like to acknowledge our medical staff for a heroic job very well done.
